Please describe the concern you have

There are 2 dogs. The smaller one seems fine but the bigger one, the German Shepherd, is incredibly thin. You can visibly see the dogs ribs. I don't know if the owners have taken the dog to the vet but their condition has not changed. I am concerned that the dog is not sick and not getting the treatment they should.

The dog seems to have a very neurotic pacing as well. And seems kind of scared of strangers.

Please don't tell them I reported it. But I am very scared for this dog.
