Comments:	Spoke to the respondent Richard, who advised he has one female dog and 2 puppies on the property. He said he is dealing with LE already that the dog will be spayed once the puppies are gone, and he confirmed the dog is not in the best of shape after the pregnancy but she is getting better. He said he lives alone and only gets home at 6pm everyday from work, but he is available on the weekend. I will contact him on Whatsapp to send photos of the dogs and their living conditions and we will take it from there.
