Follow-Up Date:	2025-09-29
Comments:	I called the owner today and he explained that he has recently lost his wife and has also been hijacked a few weeks back. He admitted that he has neglected the dog but will prioritize getting it to a veterinary clinic for the wound and the tick infestation. I asked him why the dog is outside the property and he said that she escapes through the fence but he will fix it so that she cannot get out. I will follow-up on Monday again.
