Comments:	Apon arrival we met with the care giver(Easter) who informed us that she is a care giver in the farm and the owner was not there, she open for us to the property. We observed 3x X-Breed and a puppy, 2 of them where inside a cage free roaming, there was an adequate shelter and clean water in both cages, the other one was inside the house with a puppy. They all appeared to be in a good condition and a clean living environment. The care giver informed us that all 3 dogs were not sterilized and a 14 days compliance notice for sterilization was issued.
