Follow-Up Date:	2026-02-02
Comments:	John Mambo came in. He said his aunt is very upset and very much in distress; she is also scared, and she does not understand what this complaint is about. She does have animals they are 2 young adult Maltese dogs as well as 2 cats, and they live inside the house with her. John mentioned that he is making arrangements to have the dogs sterilised. The cats are already sterilised. John also mentioned that his dog is with his aunt during the day. The dogs are only let outside when they need to do their business; other than that, they are inside the house. John also asked if possible for the inspector to bring a bag of dog food.
