General Report Comments: I was allowed access to the property by Nolan, the owner. He confirmwd that the dog Susie had given birth to 8 puppies about 4 months ago. He showed me that he had just bought a dewormer for the dog. There is 1 more puppy on the property.

The dog had access to a kennel which was more than adequate, however, the dogs living area was littered with leaves and sand.

He told me that the reason for the dog being tired is that it escapes the property. I advised him to setup a running chain, which he agreed to do. And to clean the dogs living area.

I told him that if he complies, I can arrange for the dog to be sterilised, if the dog gas gained sufficient weight. I assisted him in giving the dewormer to the female dog.

Follow up in 2 weeks regarding running chain and if we can have the dog sterilised.
