General Report Comments: The bird was outside. on the front porch when I pulled up. Ridaaw one came out to meet me. He showed me where the animal is normally kept, which is under a shaded porch at the front of the property, refer photo attached.

The bird at access to clean water and species specific food and also one or two pieces of fruit. The bird's cage was clean and the bird appeared to be in a fair condition . I did not see any signs of feather loss or stress in the bird. When the owner walks close to the cage, the bird moves close to the owner for a head rub. The perches were clean, of an adequate circumference for the bird to grip onto and well-spaced, and the cage was more than adequate in space for the bird.

The owner confirm that that is the only animal on the property. I walked through the house and at the back and did not see any other animals.

Case can be closed as I did not observe any wealthy concerns with a bird and or its cage.
