3. ATTENDANCE & OBSERVATIONS

On arrival I met with Ms Annelize Paulse who allowed me to inspect the animals .

- Bull Terrier Female (Black & White): Confined in enclosure. Owner states dog is aggressive towards other animals. Sores / wounds previously seen are no longer visible on the dog, owner cleaned the wounds with Betadine. Enclosure was clean and water was provided at time of inspection. Enclosure is still small and needs to be enlarged.
- Pitbulls (Ice & Suzzy): Both free-roaming in yard at time of inspection. Fair body condition (3/5), not underweight. Water provided. Sleeping in makeshift shelter which was clean.
- Dog "Suzzy": The TVT was no longer appearing on the dog's vagina. Owners claimed that it went back inside. We need to monitor the dog in a week.
- Chickens / Pigeons: Fair body condition. Water provided, food provided and living environment was clean.

4. ACTION TAKEN

No warning issued for dog "Suzzy". Ms Paulse was educated regarding care, enclosure size and monitoring of TVT.
