General Report Comments: I was allowed access to the property by Jarrod. He wanted to know what the procedure was going to be, moving forward. I explained to him that after discussion with senior management, we will be giving one last warning. If the owner/caretaker fails to comply, we will apply for a warrant and have the Horse removed.

The horse was still in the same paddock as with my initial inspection. The horse appeared to be healthy and had access to food and water. The horse approached me when I moved close to the fence. As per the photographs attached, there are paddocks with shelter and stables, adjacent to the horses current location. The horse just needs to be moved to a paddock with shelter.

Warning issued for the Horse to be relocated to a paddock that has adequate shelter within 72 hours.

Follow up on Monday afternoon for compliance, if no compliance, warrant to be applied for.

Warning attached to front door of respondents property .
