Case Type: Welfare Check

1. PERSON RESPONSIBLE

- Name: Sam Appies
- Cell: Not available
- Person Met: Owner not at home - Contacted telephonically

2. ANIMALS FOUND ON PROPERTY

- Total: 1 x Dog - Male German Shepherd, underweight / poor body condition, appears sick / thin.

3. ATTENDANCE & OBSERVATIONS

Upon arrival, I knocked and shouted but no one responded. I called the owner to advise him I was in front of his house.

Owner advised me telephonically not to enter his property because his dog is aggressive and might attack me. He advised me to write a warning and leave it with the neighbour. I agreed.

Owner stated he is at work but would appreciate education on how to look after the dog. He mentioned he has been buying a lot of products for the dog but they do not work.

I educated him that he needs to take the dog to a vet for examination and correct medication, using example that animals are like humans - you cannot just buy painkillers over the counter for a headache, you need a doctor to connect the dots as to what triggered it, otherwise it is not a permanent solution. I also advised puppy food for weight gain.

Property Observations:

- Dog was chained with a very long chain (approx. 7 meters).
- Dog appeared thin and sick.
- No shelter provided to the dog at time of inspection.

4. ACTION TAKEN

Warning No. 15109 issued as follows:

1. To provide the dog with adequate nutritious food on a daily basis. Puppy food / high nutrition (Pam food) recommended as dog appears thin.
2. To provide proper and adequate shelter from the elements within 5 days.
3. To take the thin / sick dog to a veterinarian for adequate treatment within 72 hours and provide SPCA with veterinary proof.
4. Owner may contact SPCA for any questions.

Service of Warning: I went to the neighbour to leave the warning as per owner's instruction but found no one at the neighbour's house. I then opened the small gate in front of the house and proceeded into the property where I attached the warning on the security gate.

Follow-up to be done on Tuesday.

Case Status: Open - Pending 72hr vet report and 5-day shelter compliance.
