1. PERSON RESPONSIBLE

- Owner Name: Thembela Rolisisu
- ID No: 973 592 3742
- Cell No: Provided via half-sister
- Person Met on Property: Nandipa Maqanda (Half-sister)

2. NATURE OF COMPLAINT

WhatsApp complaint: "The dog is being locked in the yard, it's being starved, many has died its only 1 left now, it has sores and strange things growing into his skin, he have no fair at all it stinks."

3. ANIMALS FOUND ON PROPERTY - TOTAL: 1

- Dog 1: Young Adult, Unsterilized Female, Crossbreed, Tan - Severe skin condition with hair loss. Previously heavy tick & flea infestation.

4. ATTENDANCE & OBSERVATIONS

Upon arrival I met half-sister Nandipa Maqanda who allowed me access to the property.

I observed one young adult unsterilized female crossbreed, tan in colour, with severe skin condition.

According to Nandipa, the dog was taken to the vet at Animal Welfare Society in Philippi on Sunday 4th of October 2026 for the second injection

The owners were told to bring the dog back on Sunday for the second injection which is 11th of October 2026. They showed me proof (card / receipt).

Living environment was clean. They did remove all the hazardous material where the dog was.

5. ACTION TAKEN

I verified veterinary proof and medication.

I educated them that it is very important to follow the instructions given by the vet by making sure that each and every Sunday they take the dog back to the vet until the dog is done with all the injections.

No warning was issued as veterinary treatment has been sought and compliance shown.

Follow-up inspection to be done next week to monitor skin improvement and ensure second injection is administered.

Case Status: Open - Monitoring treatment progress. Follow-up next week.
