On 24 November 2025, the SPCA attended to the address you provided for an inspection based on the complaint received. We found a tan female dog that was chained with a 2.5m chain and living in dirty conditions. The dog had access to water and shelter and was in good condition. We issued the owner with a warning to enclose the yard within 14 days and allow the dog to roam freely at all times, and to clean the yard, but also hygienically maintain it at all times. We returned on 10 December 2025 but the owner was not home. We returned to the property on 18 December 2025 and was able to do a follow-up. We found the dog free roaming, with access to drinkable water, adequate shelter and clean living environment. We conducted a final inspection on 8 January 2026 and found the dog on the property free roaming, in good condition, with access to drinkable water and adequate shelter. The living environment of the dog was also clean. The case was subsequently closed by the SPCA as there are no contraventions in terms of the Animals Protection Act 71 of 1962. We would like to thank you for bringing this matter to our attention and caring for animals . Without you stepping in, we could not help the voiceless - thank you. Kind regards Insp.
