CALL RECORD - RECEIVED

2026-02-11

Good day.

I've recieved a letter from the spca however here is a whatsapp number for after hours (0833261604) which basically doesn't work.

Lastmonth I've made contact with the spca and explained my dog's condition.

The same individuals that call the spca are the 1s whose children beat my dog with sticks. She is very playful however when I get from work most days she would be bleeding of a wound. I've also explained that our dog was diagnosed with albinism which also worsens the scars on her body it gets worse on sunny days but during winter she looks healthy.

Please find attached as she had swollen nipples in 2023 and had to be sterilized. She was then kept for 3 days to be monitored.

Kind regards

Simonè Daniels
