Therapeutic / Procedure

Dr. Nicola Griffin
Specifics:

Right Lateral Chest - Gunshot Wound:

Gunshot wound present on the right lateral chest wall. The wound opening was extended to allow adequate visualisation of the projectile pathway. The wound tract was thoroughly flushed and cleaned, with removal of hair and debris. A bleeding vessel was identified and ligated. Exploration confirmed no communication with the thoracic cavity and no involvement of major organs. The wound was closed using Monozyll and nylon sutures, leaving approximately 20% of the wound open to allow for drainage.

Additional Findings/Procedures:

No other wounds or injuries noted on examination.

Nails clipped.
