The vet has examined your dog and administered a vaccination. This vaccine will boost your dog's immunity against canine distemper virus, canine parvo virus, canine infectious hepatitis, leptospirosis and infectious tracheobronchitis.

Vaccinations while uncommon, adverse sensitivity to immunizations may occur & can include dullness, muscle soreness, low-grade fever, injection site swelling, hives and facial edema. If any such problems occur, please call us immediately.

Your pet's next vaccination is due in 1 year's time. Please deworm your pet every 6 months.

Your pet's next Rabies vaccination is due in 1 year.

Patient : Caesar

Details on 28/03/2026 (Ref: Dr Sumari Beumer BVSc - 971901)
