To whom it may concern

I, Dr B Botha, examined "Arnie", an African Grey parrot that belongs to Mrs E Werth on 22/04/26.

He was seen and treated by another veterinary surgeon on 08/01/26 for chronic feather plucking. The treatment has thus far unfortunately not been successful.

In my opinion he is in a good and healthy condition apart from the feather plucking. He is being re-homed to a bird sanctuary in 1 month's time. This will hopefully help him with the feather plucking issue.

Yours sincerely

Dr B Botha BVSc
