Comments:	Spoke to the respondents who informed me they are very frustrated as they know its their neighbour who is complaining and the situation of the dogs have not changed since our last inspection. They said they are not comfortable with us coming to do another inspection as they have done their part the last time by allowing us, and they said we need to get proof from the complainant to verify their claims before we proceed. Therefore, for our control to please send an email to the complainant requesting evidence of the concerns raised.
