Comments:	Upon arrival, I observed a cat stuck on an electric pole. I requested Control to call Fire and Rescue. They arrived and determined that the electric wires were live and that their step ladders could conduct electricity. They suggested contacting City Electricity. City Electricity advised that their response time would be between 3 and 72 hours. I then continued with my inspections. Later, while I was in Mitchells Plain, City Electricity contacted me to inform me that they were on site. The complainant subsequently confirmed that the cat had been rescued. NFA.
