---

**Owner:** Charmaine Calitz (060 825 2210)

**Date:** 21/01/2026

**Horse name:** Danesca

**Age:** 31 years

To whom it may concern,

Higveld Horse Care Unit asked me to do a clinical examination on the horse.

Temperature 38°C, Heart Rate 40bpm, Gut sounds normal, Lungs NAD.

Body condition 2/5.

Left metatarsal area swollen. This swelling has been there for the last 10 years according to owner. This swelling is hard and cool to touch. No evidence of active inflammation.

Teeth as expected.

According to me the horse is doing good for his age. He is eating good and passing stool. The molars might need a dental to ease eating.

For any further queries, please feel free to contact me.

Thank you

Dr. Johan Human
