Pet Care 101

VACCINATIONS

To ensure pets have a long and healthy life, it's essential to vaccinate regularly to protect against disease.

FLEA & WORM PREVENTION

Regular treatments with an effective deworming medication should be administered at least every three months. Regular, year-round flea control is also crucial for your pet's health. Consult your vet to determine the best schedule for your pet.

IDENTITY & SAFETY

1 in 3 pets experience getting lost. Keep your pet's microchip contact details up to date on the Identipet web-app. Dogs should wear a collar and tag at all times.
